**Demand Responsive Transport Services:
Towards the Flexible Mobility Agency**

Edited by G. Ambrosino, J. D. Nelson and M. Romanazzo

Published by ENEA , Italian Energy Authority
 Status: chapters final version on 20 April 2003
 Foreseen graphical work adaptation: 15 April-15 May 2003
 Foreseen Publisher work: June-August 2003
 Book delivery: September/October 2003
 Book Presentation: December 2003 – FAMS/UITP Workshop

Item	
Table of Contents	
Preface [Prof David Begg]	
Introduction – Ambrosino, Romanazzo, Nelson	
1.	Actions for a sustainable urban mobility – Romanazzo, Ambrosino Nelson 1.1 Evaluation of traffic growth in urban areas 1.2 Impact of traffic on environment and health 1.3 Energy waste of passenger transport in city areas 1.4 How to intervene? 1.4.1 Possible actions in the short term 1.4.2 Integrated actions and planning for the longer term 1.5 The role of flexible collective transport
2.	Objectives, requirements and needs of users – Finn, Ferrari, Sassoli 2.1 What is the purpose of User Needs Analysis? 2.2 A six-step approach for determining User Needs 2.3 User Groups and Categories 2.4 Typical needs of Users 2.4.1 Transportation policy 2.4.2 Core needs of the users 2.4.3 Potential conflicts 2.4.4 Critical factors for DRT 2.5 Four case studies of User Needs Analysis 2.5.1 Case Study 1: IVRS and Internet in Belgium 2.5.2 Case Study 2: Elderly in Sweden 2.5.3 Case Study 3: Rural Areas in Ireland and Northern Ireland 2.5.4 Case Study 4: Access to jobs in USA 2.6 New directions for future research 2.6.1 Theme 1: Predicting the market 2.6.2 Theme 2: Pricing 2.6.3 Theme 3: Costs and sustainability

3.	<p>Service typologies and scenarios – Engels, Ambrosino, Boero</p> <p>3.1 Filling the Gap</p> <p>3.2 Service concepts</p> <p>3.2.1 Route and time concepts</p> <p>3.2.2 Booking concepts</p> <p>3.2.3 Network concepts</p> <p>3.2.4 Vehicle allocation concepts</p> <p>3.3 Optimisation of DRT at different levels</p> <p>3.3.1 Management level</p> <p>3.3.2 DRT service concept definition</p> <p>3.3.3 Reservation handling and booking phase</p> <p>3.3.4 Service journey</p> <p>3.4 The right concept in the right place</p>
4.	<p>System Architecture – Ambrosino, Boero, Engels</p> <p>4.1 System Architecture: Importance and definition</p> <p>4.2 Functional Architecture</p> <p>4.2.1 The context of the DRT system</p> <p>4.2.2 Management of DRT services</p> <p>4.3 Information Architecture</p> <p>4.3.1 Conceptual data model</p> <p>4.3.2 DRT data dictionary</p> <p>4.4 Physical and Communication Architecture</p> <p>4.5 Integration with other mobility systems</p>
5.	<p>Technologies for DRT Systems – Iacometti, Setti, Scholliers, Gorini, Eloranta</p> <p>5.1 Architecture components of a DRT system</p> <p>5.1.1 DRTS Control Centre</p> <p>5.1.2 Customer devices</p> <p>5.1.3 On-board Units</p> <p>5.1.4 Long-range Communication Network</p> <p>5.2 Technologies adopted within SAMPO, SAMPLUS and SIPTS</p> <p>5.2.1 Technological options for demonstration sites</p> <p>5.2.2 RING: the Belgian DRT system</p> <p>5.2.3 PERSONALBUS: the Italian DRT system</p> <p>5.2.4 MobiRouter: the Finnish DRT system</p>
6.	<p>In-vehicle technologies – Scholliers, Gorini, Kaisto</p> <p>6.1 In-vehicle infrastructure</p> <p>6.2 Technologies for communication and positioning</p> <p>6.2.1 Communication between the vehicle and the TDC</p> <p>6.2.2 Positioning technologies</p> <p>6.2.3 In-vehicle networks</p> <p>6.3 Requirements for in-vehicle terminals for DRT applications</p> <p>6.3.1 User needs</p> <p>6.3.2 Ergonomic requirements</p> <p>6.4 Need for an open platform</p> <p>6.5 In-vehicle terminal properties</p> <p>6.5.1 Displays</p> <p>6.5.2 Input Devices</p> <p>6.5.3 Applications</p> <p>6.6 Examples of in-vehicle terminals</p> <p>6.6.1 The SIPTS approach: Nokia Communicator</p> <p>6.6.2 The INVETE in-vehicle terminal</p> <p>6.7 Implementation aspects</p>
7 (6)	<p>Vehicles for flexible transport – Genovese, Ragona</p>
8 (7)	<p>Experience and applications of DRT in Europe – Ambrosino, Mageean, Nelson, Romanazzo</p>

8.1	<p>Introduction</p> <p>8.1.1 Major demonstrators and applications</p> <p>8.1.2 Major characteristics of the SAMPLUS DRT sites</p> <p>8.1.3 An evaluation methodology for DRT services</p>
8.2	<p>The experience of De Lijn in Belgium – Engels, Weyns</p> <p>8.2.1 Introduction</p> <p>8.2.2 Operational context</p> <p>8.2.3 Organisational aspects</p> <p>8.2.4 A telematics system to manage DRT</p>
8.3	<p>The experience of Finland in Keski-Uusimaa – Eloranta, Kalliomaki</p> <p>8.3.1 Background</p> <p>8.3.2 Site Description</p> <p>8.3.3 Results</p>
8.4	<p>The Rural Lift experience in Ireland – Kennedy Grimes</p> <p>8.4.1 Description of the project</p> <p>8.4.2 Description of the site</p> <p>8.4.3 Operational services</p> <p>8.4.4 Resources involved</p> <p>8.4.5 Operators and the role of the local authority</p> <p>8.4.6 Technologies used</p> <p>8.4.7 Results</p>
8.5	<p>The experience of ATAF with PersonalBus in Florence – Di Volo, Binazz, Pettinellii</p> <p>8.5.1 Introduction</p> <p>8.5.2 History of PersonalBus</p> <p>8.5.3 DRT service concept in Florence</p> <p>8.5.4 Results obtained</p> <p>8.5.5 Future developments</p>
8.6	<p>The My Bus experience in Fano – Benedetti</p> <p>8.6.1 Introduction</p> <p>8.6.2 The traditional service</p> <p>8.6.3 The operation headquarters</p> <p>8.6.4 The communication system</p> <p>8.6.5 The buses used</p> <p>8.6.6 The reference regulation</p> <p>8.6.7 The results obtained</p>
8.7	<p>Recent British Experience – Mageean, Nelson, Grosso</p> <p>8.7.1 Introduction</p> <p>8.7.2 Overview of recent rural DRT schemes</p> <p>8.7.3 Towards Best Practice – the DRT Installation Study</p> <p>8.7.4 The Phone and Go research programme</p> <p>8.7.5 Conclusions</p>
8.8	<p>Lessons from the European experience – Mageean, Nelson</p> <p>8.8.1 The Market Environment: institutional and legal barriers</p> <p>8.8.2 Economic barriers</p> <p>8.8.3 Impact on Intermodality and System Integration</p> <p>8.8.4 Conclusions</p>
9 (8)	<p>Institutional, Organisational and Regulatory Aspects – Kalliomaki, Eloranta, Sassoli</p> <p>9.1 Development of DRT systems: key issues</p> <p>9.2 Basic frameworks</p> <p>9.3 Organisation and structure of public transport and related services</p> <p>9.4 Provision of subsidies</p> <p>9.5 Socio-economic issues</p> <p>9.6 Operational issues</p> <p>9.7 Technology issues</p> <p>9.8 Implementation issues</p> <p>9.9 Contractural issues</p>

10 (9)	<p>Collective Taxis – Perugia</p> <p>10.1 Introduction</p> <p>10.2 A collective taxi service for the airport</p> <p> 10.2.1 The service model</p> <p> 10.2.2 Management of the movements</p> <p> 10.2.3 On-line assistance service</p> <p> 10.2.4 Dimensions of the fleet</p> <p> 10.2.5 Structure of the organisation and technologies</p> <p>10.3 Night service</p> <p> 10.3.1 The service model</p> <p> 10.3.2 Organisational structure and technologies</p>
11 (10)	<p>Car Sharing – Valenti</p> <p>11.1 Introduction</p> <p>11.2 Car sharing in Italy</p> <p>11.3 Technological aspects</p> <p>11.4 The economic convenience of car sharing</p> <p>11.5 Strategies for development and actions for sustainability</p>
	<p>Are scheduled two other chapters:</p> <ul style="list-style-type: none"> - Collaboration among Taxi drivers and DRT organization by T. Koorsisaari - Vehicle tipology for flexible service, I. Westerlund
12 (11)	<p>FAMS – towards the agency for Flexible Mobility Services – Ambrosino, Ferrari, Nelson</p> <p>12.1 Technical Context and Objectives of FAMS</p> <p>12.2 Innovation in FAMS</p> <p>12.3 Case Studies and the FAMS Consortium</p> <p> 12.3.1 FAMS in Florence, Italy</p> <p> 12.3.2 FAMS in Angus, Scotland</p> <p>12.4 The FAMS Evaluation</p> <p> 12.4.1 Evaluation Objectives</p> <p> 12.4.2 Evaluation methodology</p> <p> 12.4.3 Closing remarks</p>
	Angus experience in FAMS project Eloranta, Masson
	FAMS architecture and approach in Flrionce, Boero, Binazzi
	User needs and Evaluation Framework in Flexible Services Agency , Finn, Mageean
