

PRESS RELEASE

11 organisations from across industries and transport modes join forces today to drive forward the electrification of surface transport

Brussels, 19 March 2013

Alstom, AVERE, CER, ETRA, EURELECTRIC, EUROBAT, Going Electric, Nissan, Polis, UITP, and UNIFE join forces today by creating a Platform for the Electrification of Surface Transport.

Today, 19 March 2013, the Platform for the Electrification of Surface Transport is holding its maiden event at the Hotel Renaissance in Brussels, starting at 18:30.

MEP Gesine Meissner (ALDE, Germany) will give the opening remarks, followed by introductory presentations by **Hans ten Berge**, Secretary General of EURELECTRIC and by **Libor Lochman**, Executive Director of CER. This will be followed by a panel discussion with **Daniela Rosca**, Head of Unit C1 (Clean Transport and Sustainable Urban Mobility), DG MOVE; **Olivier Paturet**, General Manager, Zero Emissions Strategy, Nissan Europe; **Alain Berger**, Vice-President for European Affairs and Head of Brussels office, Alstom; **Alain Flauch**, Secretary General, International Association of Public Transport (UITP), and **Joost van Gils**, Vice-Director Economic Development and Mobility, Province of North Brabant, the Netherlands, representing Polis. The discussion will be moderated by **Professor Joeri van Mierlo**, Vice-President of AVERE.

The Platform for the Electrification of Surface Transport sees electrification as a key way to reduce greenhouse gas emissions from transport and to reduce the dependence of the European Union on imported oil. In their common statement published today, the 11 organisations call upon public authorities to support the further electrification of surface transport on the basis of a multi-modal approach. The joint statement is attached.

MEP Gesine Meissner states: "The vision of the Platform is to aim for fully electrified door-to-door multimodal transport solutions. This is an exciting prospect for European citizens and businesses, with significant growth and employment prospects."

Note to Editors

The International Association of Public Transport (UITP) is the international network for public transport authorities and operators, policy decision-makers, scientific institutes and the public transport supply and service industry. It is a platform for worldwide cooperation, business development and the sharing of know-how between its **3,400** members from **92** countries. UITP is the global advocate of public transport and sustainable mobility, and the promoter of innovations in the sector. Visit our website www.uitp.org
