## Press Release

Brussels, 5 June 2013

### Fourth Railway Package - rail sector needs Technical Pillar

The Community of European Railway and Infrastructure Companies (CER), the Association of the European Rail Industry (UNIFE), the International Union of Wagon Keepers (UIP), the European Passenger Train and Traction Operating Lessors Association (EPTTOLA) and the International Association of Public Transport (UITP) wish to confirm their strong support for the Technical Pillar of the Fourth Railway Package and stress the importance and urgency for reaching an agreement between the European Council and the European Parliament on this part of the proposal as laid out in the compromise text prepared by the Irish Presidency in April 2013.

Today's situation is proving challenging for the railway sector and the competitive performance of the railways as a mode of transport. The authorisation and certification procedures are costly and time consuming. The overall authorisation process for vehicles in Europe can last longer than two years, immobilising assets worth €1.2bn that are waiting for authorisation and cannot be put into service.

The authorisation and certification processes must be simplified as quickly as possible and the European Railway Agency (ERA) must become progressively a one-stop-shop for authorisation and certification. To achieve that, there shall be an evolutionary plan for competencies growth at ERA and clear responsibilities for single safety certificate and vehicle authorisation.

The European rail sector regards the simpler and quicker authorisation and certification processes as a pre-condition for achieving the objectives set by the European Commission's 2011 Transport White Paper: increase capacity of the railway system and build the Single European Railway Area. They are furthermore needed to increase the competitiveness of the sector vis-à-vis other modes of transport in order to attract citizens and goods to railways for a sustainable, and potentially carbon-free transport system.

The European rail sector encourages the European Parliament and the European Council to reach an agreement during the current parliamentary mandate, starting from the forthcoming council transport meeting on June 10, and to not miss this historic opportunity to revitalise the European railway system.

**CER Executive Director Libor Lochman** added: *"The discussions about the Technical Pillar are now heading in the right direction and need to be accelerated. CER shares the opinion of the necessity for a stronger European Railway Agency acting as a one-stop-shop and deciding about vehicle authorisation, safety certification and trackside ERTMS, while cooperating closely with the national safety agencies."*

**UNIFE Director General Philippe Citroën** highlighted: *“The sector has long been calling for what the European Commission has proposed in the Technical Pillar. It must be adopted during this parliamentary term to give a needed boost to the development of the rail industry in Europe.”*

**UIP Secretary General Gilles Peterhans** stated: *“If we want one day to see a competitive rail freight market at European level, the streamlining of administrative procedures, the setting of clear roles and responsibilities and the removing of superfluous national regulations are the priorities we all need to care about at hand.”*

**EPTTOLA President Tim Gilbert** commented: *“The proposals in the technical pillar, along with the detailed recommendations for simplifying and speeding up authorisations, are essential for the industry.”*

**UITP Secretary General Alain Flausch** concluded: *“The regional and suburban rail operator members of UITP support the enactment of the technical pillar, while emphasising a clear and undisputable exclusion of the functionally separated local, suburban and regional passenger railway lines from the scope of the legislation.”*

The Community of European Railway and Infrastructure Companies (CER) brings together more than 70 European railway undertakings and infrastructure companies. CER represents the interests of its members towards the European institutions as well as other policy makers and transport actors. CER’s main focus is promoting the strengthening of rail as essential to the creation of a sustainable transport system which is efficient, effective and environmentally sound. For more information, see [www.cer.be](http://www.cer.be)

UNIFE represents the European Rail Industry in Brussels since 1992. The Association gathers more than 70 of Europe’s leading large and medium-sized rail supply companies active in the design, manufacture, maintenance and refurbishment of rail transport systems, subsystems and related equipment. A further one thousand suppliers of railway equipment partake in UNIFE activities through 13 national rail industry associations. UNIFE members have an 80% market share in Europe and supply more than 50% of the worldwide production of rail equipment and services. [www.unife.org](http://www.unife.org)

The International Association of Public Transport (UITP) is the international network for public transport authorities and operators, policy decision-makers, scientific institutes and the public transport supply and service industry. It is a platform for worldwide cooperation, business development and the sharing of know-how between its 3,400members from 92 countries. UITP is the global advocate of public transport and sustainable mobility, and the promoter of innovations in the sector. In the European Union, the UITP EU Committee (EUC) represents the views of the public transport undertakings of the 27 member countries. It is closely following and participating in the elaboration of the different European policies and initiatives that have an impact on urban, suburban and regional public passenger transport.
