

**“CLEVER” BUS STOP ARRIVES IN FLORENCE.  
TIMETABLES, LINES AND BUS EXCHANGE IN REAL TIME**

**Press Conference**

**MONDAY 8 JUNE      15:30-16:00      Stand 1D550 Hall A**

“Clever Bus Stops” arrive in Florence. They will be designed by the Mit. Waiting for the bus, you will be able to navigate the net or the big touch screen, to download music and browse Facebook.

This will be possible thanks to the new “Clever” Bus Stops designed by the Mit for Ataf.

The Adaptable Bus Stops includes also the bus pole: two prototypes ordered by Ataf to the Mit thanks to the agreement with the Florence Province which adheres to the Senseable City Consortium with the famous Boston Institute.
