Alexander Schabert, Co-Founder and Chief Commercial Officer, ViriCiti, Amsterdam, The Netherlands

Alexander Schabert is Co-Founder and Chief Commercial Officer of ViriCiti - the monitoring solution for commercial electric fleets. He spends his time and energy working with transit agencies and operators across North America and Europe to effectively scale EV fleets.

Alexander studied mechanical engineering at Technical University of München and UC Berkeley. Since over 10 years, he specialized in alternative drives (fuel cell, battery) and since 6 years he focuses on the topic of electric buses specifically.

Originally from Germany, Alexander now lives in Amsterdam and travels around the world to support more than 80 operators with the introduction and operation of electric buses.
