

ADVANCING
PUBLIC
TRANSPORT

**Didier van de Velde, Researcher at the Delft University of Technology
and Director at inno-V, The Netherlands**

Mr. van de Velde's research and advisory work concentrates on regulatory reforms in local public transport and the railway sector. He is expert on public transport institutional reforms and has a wide knowledge on practices and reforms undertaken in European public transport during the last decades. He participated in many European research studies on these topics and advised local authorities, ministries and the European Commission on issues pertaining to institutional reforms and the introduction of competition in public transport.
