Field study on bus depots and bus maintenance

Published: November 2013
Format: Hardcopy - Full Colour - 29 pages
Language: EN

This technical study evaluates the differences between various engine technologies and examines the consequences of those differences. Based on the in-the-field experience of international public transport companies, this report addresses the need for economical and environmentally friendly engine technologies for the future. It provides a solid overview of the factors to bear in mind when planning a public transport bus depot and highlights key aspects to consider for certain engine technologies.

Manual for the Development of Bus Transport System Safety Management

Published: October 2008
Format: CD
Languages: CD-Rom in EN, FR, DE, ES, IT + manual A5

The primary purpose of this manual is to help bus operators to achieve the safest possible bus transport system by establishing, developing and implementing a well-organised and structured System Safety Programme Plan. This document is designed to serve as a practical manual providing information on transport system safety management and showing how related technologies available on the market can be used with the maximum efficiency but it may also be used as an evaluation tool for existing System Safety Plans.

Development Policy for Public Transport Trolleybus Subsystems

Published: August 2007
Format: Hardcopy - brochure - 12 pages - Full Colour
Languages: EN, DE, ES, FR

The trolleybus brochure presents development policies for public transport trolleybus systems. The EU-27 + Switzerland have more than 100 towns where trolleybus lines are operated: on a worldwide scale the total number of towns is estimated at around 360. The advantages of this clean and silent mode of public transportation are presented in relation to modern town strategies such as sustainable development and quality of life in cities. Substantial discounts for large orders (above 10). Send an e-mail to publications@uitp.org

Clean Fuels for Road Public Transport
UITP Bus Committee

Published: January 2004
Format: Hardcopy - 37 pages
Language: EN

This comprehensive report, illustrated with tables and graphs, analyses emissions and their measurement, compares and assesses the different fuel technologies available - from fossil fuels through various renewable options to electrical energy - and gives a thorough evaluation of the cost aspect, all based upon data collected from real-life operations. Compiled using the combined knowledge and experience of the UITP Bus Committee, it is designed to help achieve a balance between ecological and financial concerns when making fuel and fleet decisions.

Good Fences Make Good Neighbours
UITP Metro Contract Study
Full report + 13 case studies

Published: May 2006
Format: CD
Language: EN

The study focuses primarily on contractual forms in metro operation. It covers the following metro systems: Barcelona, Brussels, Copenhagen, Docklands Light Rail/London (DLRL), Hamburg, Hong Kong, Paris, Santiago, Stockholm, Vancouver, London Underground. The study reviews various forms of contractualisation and points out the interesting features that they contain. Its aim is to give guidance and inspiration for those in the process of - or considering venturing into contractualisation by means of tendering or otherwise.

Guidelines for Selecting and Planning a New Light Rail System Level 1 + 2 + 3

Published: February 2004
Format: CD
Language: EN, FR, DE

The range of material is presented in three separate but linked levels, to meet the degree of detail required by the reader. Level 1 summarises (in English, French and German) the key issues, procedures and decisions from initial definition of a city's transit objectives to the eventual opening of a new system. Level 2 explores in greater detail over 30 related wide-ranging topics outlined in Level 1. Level 3 comprises case studies from particular cities and other practical material.

Market Study of Urban Passenger Transport in Russia and Ukraine

Published: May 2009
Format: CD
Languages: EN, RU

This study comprises data from 20 Russian and 4 Ukrainian cities. The majority of the information has been supplied by departments of transport, and by city transport companies. Although providing a limited cross-section of the existing market in Eurasia, these results can be interpreted as broadly representative of the overall market and offer an overview of the main difficulties faced.

The Russian version includes more information about how the city administrations organise tenders for rolling stock, routes, pricing, financing (in the past and future) and different projects. The English version comprises a narrower scope of information such as: the state of rolling stock, number of company employees, number of routes and number of passengers transported by the companies during the year, etc.

Latest Figures on the Urban Bus Fleet in the European Union
Public Transport Statistics Report - Issue 1

UITP code: **PTS1**
Full price: **80.00 EUR**
Member price: **0.00 EUR**

Published: May 2007
Format: CD
Language: EN

This CD-Rom contains the results of a survey on the urban bus fleet in the European Union. The survey provides data on the use of the different types of fuel and drive train technology, accessibility features, age and structure of the bus and trolleybus fleet operated in EU cities with over 100,000 inhabitants, with reference to the year 2005. The survey also contains information on procurement mechanisms and fleet management. The purpose of the survey is to provide quantified information in support of decision-making, advocacy and research.

Mobility in Cities Database

UITP code: **MCD**
Full price: **1200.00 EUR**
Member price: **600.00 EUR**

Published: July 2006
Format: CD
Language: EN

The Mobility in Cities Database CD-ROM contains the main results of a major UITP research project on the economics of urban mobility. A total of 120 indicators were collected in a sample of 52 cities worldwide for the year 2001. In addition to the database itself, which is accessible through a user-friendly interface, the CD-ROM also features a 50-page analysis and recommendations report, fact sheets interpreting the evolution of key indicators between 1995 and 2001 in the light of transport policies in more than 30 cities, and a graphical tool for

comparisons between cities. This wealth of information enables urban and transport planners to make decisions based on facts. The analysis and recommendations report puts forward a set of arguments in favour of public transport. Furthermore, the data can be used to support research on various aspects of mobility in urban areas.
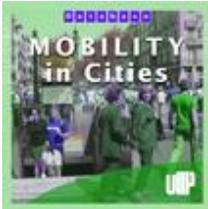

Order Data for the Cities of your Choice!
Source: Mobility in Cities Database

Published: July 2006
Format: Excel file
Language: EN

It is now possible to order data for the cities of your choice from the Mobility in Cities Database.

Send an email to sonja.failly@uitp.org indicating the cities of your choice.
Following receipt of payment, you will receive an excel file containing the data for the cities ordered for all the indicators, as well as a PDF file with the definitions

Category: Policy
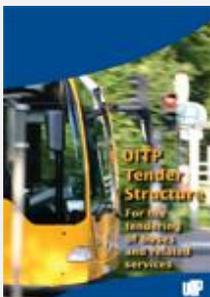

UITP Tender Structure
For the tendering of buses and related services

Published: October 2009
Format: CD and hardcopy
Language: The CD-Rom contains the English, French, German, Spanish and Italian versions

This second release of the UITP tender structure recommendations is the outcome of a joint analysis by operators, manufacturers and organising authorities, carried out under the supervision of UITP. The new edition takes into account all the aspects of green tendering including the European directive on clean and energy-efficient buses (EC/2009/33). A UITP working group conducted a thorough review of current rules and observed practices throughout Europe. It came to the conclusion that the diversity in the definitions and the structure of tender documents used to date are inefficient and complicate the tender process. On that basis, the UITP working group created a model for tender harmonisation, which operators and organising authorities may choose to use when issuing future tenders- indeed, UITP strongly encourages them to do so. Any move towards a better balanced relationship between all actors in the public transport supply chain (authorities, operators, manufacturers) is a step in the right direction, opening up possibilities for decreasing costs whilst maintaining quality for all the parties involved. This recommendation is intended for the purchase/ offering of buses and related services.

One Small Step...

Published: May 2009
Format: CD
Language: EN

The primary target group for this report is the railway companies who have to implement PRM measures. But equally important are the national, regional and local public transport authorities who, in most cases, define and assign these duties to the railway companies. Furthermore this report is designed to raise awareness of Accessibility, not only within the two aforementioned groups, but within the whole spectrum, from architects to politicians, law makers and standardisation bodies.

Improving Access to Public Transport
In partnership with ECMT

Published: November 2004
Format: Hardcopy - Full Colour - 82 pages
Language: EN, FR

This report explores how improved cooperation between public transport service providers and local authorities - along with a close sustained dialogue with members of the disabled community - can ensure better accessibility to public transport. With a focus on experience in four cities, Gothenburg (Sweden), Grenoble (France), Prague (Czech Republic), and Liverpool (UK), the report identifies the critical elements of partnerships between public authorities at different levels of government and public transport operators.

Improving surface-level interchange hubs

Published: April 2012
Format: CD
Language: EN

This toolkit for assessing passenger transfers at small, medium and large surface-level interchange hubs will assist public transport professionals confronted with the need to assess and improve the quality, planning and design of bus stops and interchange stations at surface level. Any such assessment must put forward the passenger point of view and consider the integration of the interchange into the urban environment.

A dedicated UITP Working Group has developed a general multi-layered checklist, the purpose of which is to outline the configuration of interchanges and the equipment that public transport operators/authorities should consider providing. The work was carried out with the passenger point of view in mind.

A Vision for Integrated Urban Mobility: Setting up your Transport Authority

Published: April 2011
Format: CD and brochure
Incl. 21 case studies and CD-Rom with text available in DE, FR, DE and ES

The first part of this UITP publication outlines and stresses the central role of transport authorities when developing visionary integrated policies. The second part offers a comprehensive overview of the key questions that need to be addressed when setting up or reorganising a transport authority. Furthermore, a number of case studies have been chosen from Europe, the Americas, Africa, the Middle East, Asia and Oceania to illustrate, from one city to another, the diverse range of governance approaches, of public transport markets and of competences devolved to authorities.

Large Events and Public Transport: a Winning Team
Successfully handling transport during large events

UITP code: **PTLE**
Full price: **150.00 EUR**
Member price: **75.00 EUR**

Published: June 2009
Format: CD
Language: EN

The Working Group on PT & Large Events is delighted to present this CD-ROM that contents the findings of the working group:
· Checklist for PT operators and authorities outlining the questions that public transport operators/authorities have to ask themselves in when preparing for large events.
· Collection of case studies covering a wide range of events. The case studies follow exactly the same structure as the checklist in order to illustrate how the different points were addressed in practice in different situations.
· Focus Paper which is the policy document aiming at raising the awareness of decision makers and event owners regarding the benefits of taking public transport into account in early decisions on venue location and the overall transport scheme for the event.
· Additional references on MOBI+, the UITP electronic library.

Changing the Culture in Public Transport

ADVANCING PUBLIC TRANSPORT

A Market in Motion

UITP code: **AMM**
Full price: **80.00 EUR**
Member price: **40.00 EUR**

Published: April 2005
Format: Hardcopy - Full Colour - 58 pages
Language: EN

This report can help to raise awareness about the importance of a clear and conclusive division of tasks between the public authorities and/or organising authorities and the operators. It will also enable choices to be made regarding the appropriate division of tasks based on the circumstances and needs of a particular region. Creating clarity for the parties demanding and supplying the service helps improve the efficiency of the public transport system and the quality of its service. This report is based on the data collected from the members of the Organising Authorities Committee and does not necessarily reflect the official positions of the International Association of Public Transport.

Demand Responsive Transport Services: Towards the Flexible Mobility Agency
ENEA, UITP, FAMS, Information Society Technology

UITP code: **DRTS**
Full price: **25.00 EUR**
Member price: **25.00 EUR**

Published: January 2004
Format: Hardcopy - 325 pages
Language: EN

This report offers an insight into the issues, challenges and realities that demand responsive transport (DRT) faces internationally. The opportunities that new technology and vehicle types present coupled with a growing international awareness of the importance of DRT makes this comprehensive review of the issues priority reading.

A One-Stop Approach to Mobility: The Challenge of Integration

Published: January 2003
Format: Hardcopy - Full Colour - 43 pages
Languages: EN, FR, DE, ES

This handbook pinpoints eight problems that deal with the issue of integration in public transport as broadly as possible, looking at customer needs and the potential implications of integration for the operational aspects of public transport. For every problem identified, a solution is provided along with some good practices. The selection of good practices in this handbook is intended to showcase a diverse range of solutions that could be transferable to our own networks.

Joint UITP-CUTA International Security Conference
Public Transit Systems and Security: Achieving the right balance
Montreal, 11-12 November 2009 - Conference proceedings

UITP code: **ISC**
Full price: **150.00 EUR**
Member price: **75.00 EUR**

Published: January 2010
Format: CD
Language: EN

The CD-Rom contains the full set of proceedings of the joint UITP-CUTA International Security Conference that took place in Montreal (November 2009).

Public Transit Security is a key concern worldwide. Operational security issues such as vandalism, petty crime, fraud and staff security are costly issues which public transit organisations of all shapes and sizes face on a daily basis. On top of this, recent terrorist attacks show that public transit systems continue to be vulnerable and potentially attractive targets for terrorists. The conference considered how public transit organisations across the globe address these challenges to achieve a balance between an efficient public transit operation and appropriate security.

UITP
ADVANCING PUBLIC TRANSPORT
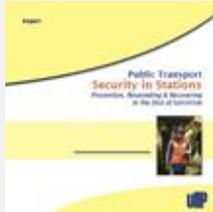

Public Transport Security in Stations
Prevention, responding and recovering in the face of terrorism

Published: October 2007
Format: CD
Language: EN

Recent years have seen an increase in the violence of terrorist activities. Public transport has become a target. Whilst preventing terrorist activities as such is the prime responsibility of governments, the public transport sector also has to make concerted efforts to protect its passengers and infrastructure. This report focuses on security planning for stations, which are crucial network elements, as well as gateways into and out of the public transport networks for both passengers and emergency response forces. It summarises current knowledge and suggests a series of approaches and measures that are good practice and have proven their benefit.

Better Urban Mobility in Developing Countries

Published: January 2003
Format: Hardcopy - Full Colour - 44 pages
Languages: EN, FR, ES PT

----Sold in quantities of 10----This handbook contains 11 problems, 11 sustainable solutions and 13 good practices, which are based on the three pillars of sustainable mobility. The solutions address issues such as the anarchical development of cities, under-investing in infrastructure, growing congestion and the increases in emissions caused by car use. The handbook is easy to use and is a must-have for public transport operators, decision-makers and development officials seeking clear guidance. Quantity 1 = 10 copies.
