# PUBLIC TRANSPORT FOR LARGE EVENTS

3 > 5 DECEMBER  
ISTANBUL, TURKEY

The UITP Academy, in partnership with Metro Istanbul, invite you to join a training on managing public transport for large events. Designed for mobility professionals, this programme explores how to deliver seamless, efficient, and sustainable mobility solutions during global events like the Olympics or the World Cup.

Large events bring both opportunity and challenge—boosting tourism and urban development while placing intense pressure on public transport systems. This training offers practical insights, case studies, and proven strategies to manage demand surges, integrate smart technologies, and plan effectively for financial, social, and environmental sustainability.

## WHAT YOU WILL LEARN

- Understand the Impact of Large Events on Urban Mobility
- Identify Key Challenges in Public Transport Operations for large events
- Explore Best Practices from Global Case Studies
- Integrate Technology and Innovation in mobility for large events
- Develop Practical Strategies for Planning and Execution

## WHO IS IT FOR

- Middle management staff of public transport operators, authorities
- Management of planning and operational department of the public transport operators
- Safety and security management and station operations
- Management of event organizers
- Traffic management officials
- Police and emergency departments
- Those interested in an international perspective on large events management
- The course welcomes senior professionals worldwide
